## **METEOR, UFO OVER ISRAEL? NOPE, A FUTURE GAS ATTACK**

**by Barry Chamish**

July 17, 2008

On the night of July 9, Israelis saw a flashing orange light in the sky. They were told it was a meteor, though a few experts warned them that it couldn't have been.

On the night of July 9, Iran launched 9 missiles, most capable of hitting Israel. On tv we saw that they were flashing orange in the nighttime sky.

And duuuuh! Officially, no one in Israel told the truth, that Iran had launched a warning missile over Israel. Read on.

From Ha'aretz:

Meteor sighting sparks UFO panic in Israel

*An unexpected meteor cut through Israel's skyline from east to west Tuesday evening and disappeared shortly after, causing panic throughout central Israel and bafflement among astronomers who failed to predict it...Rafaeli explained that at one point he could no longer see the light that divided the skies. "As I am a man of exact sciences in my professional life, I don't believe in aliens. It is possible that it was a case of a meteor that entered the atmosphere, **but it does not appear that way**. In any case, it was a beautiful site."*

*TEHRAN, Iran - Iran test-fired nine missiles Wednesday, including ones capable of hitting Israel, making a dramatic show of its readiness to strike back if the United States or Israel attacks it over its nuclear program.*

Israel Today Staff

*Meteor sparks fears of UFO, Iranian missiles in Israel*

*A relatively large and unexpected meteor streaked across the sky over central Israel Tuesday evening, sparking widespread fears that the nation was under attack by Iran, Syria, or perhaps aliens.*

*The large bright ball and flaming tail were visible around 8 PM and were seen by thousands of Israelis from Jerusalem to Tel Aviv. As soon as the meteor had disappeared, burned up in earth's atmosphere, calls to the police began pouring in.*

*Panic-stricken Israelis were certain that one of Israel's many regional enemies was finally making good on threats to destroy the Jewish state.*

And further, duuh, Iran is now distributing gas for the heads of Hizbullah's missiles:

**FADC: Hand out gas masks immediately**

Jul. 15, 2008

Rebecca Anna Stoil , THE JERUSALEM POST

*Responding to a report that appeared in the Kuwait-based Al-Siyasa newspaper, which said Hizbullah was being supplied with chemicals from North Korea, such as nerve gas or mustard gas, to create rockets with chemical warheads, Steinitz said, "I cannot exclude this possibility..."*

*While the Israeli government had deliberately collected gas masks from the public and refused to distribute new ones:*

*Israeli civilians are unprepared for nonconventional attacks, warned prominent members of the Knesset Foreign Affairs and Defense Committee Tuesday afternoon, blasting the defense establishment for ignoring calls to fix the situation.*

*Committee chairman MK Tzahi Hanegbi (Kadima) and MK Yuval Steinitz (Likud), chairman of the Subcommittee for Readiness, held a press conference during which they called on the government to begin immediate distribution of gas masks to the public. They complained that although Steinitz's subcommittee published a report on the subject a year ago, no steps had been taken to fix the problems.*

*That's because a real-life Holocaust by gas is being prepared for 6 million Jews of Israel with Israeli government collusion. Duuh!!*
